To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. [About Scopus Author Identifier](#)

What is ResearcherID?

ResearcherID provides a solution to the author ambiguity problem within the scholarly research community. Each member is assigned a unique identifier to enable researchers to manage their publication lists, track their times cited counts and h-index, identify potential collaborators and avoid author misidentification. In addition, your ResearcherID information integrates with the Web of Science and is ORCID compliant, allowing you to claim and showcase your publications from a single one account. Search the registry to find collaborators, review publication lists and explore how research is used around the world!

Subject: **ResearcherID - Invitation to Register in ResearcherId.com** [\[More information\]](#)

From: *researcherid@researcherid.com*

Dear Laleh Saravi,

Thank you for your interest in joining ResearcherID!

Copy and paste this link into your browser to complete the registration process:

<http://www.researcherid.com/VerifyURL.action?id=FkOTJ8Ds296Ydk%2BbUMfv%2BFrt4vUSGY8yq47sqEG8Kk4PC8f6x4jBQ%3D%3D>

As a registered member, you can:

- Manage your publication list and showcase your work
- Track your times cited count and h-index
- Identify potential global collaborators
- Avoid the common problem of author misidentification

Because ResearcherID integrates with Web of Science\* and EndNote online, you can claim your publications quickly and easily. These publications will then
